

## 2015 ACAP HEDIS<sup>®</sup> Comparison Analysis

It compares the average scores from 34 ACAP plans and the 144 remaining plans (all plans minus ACAP members) that submitted to NCQA Quality Compass<sup>®</sup>. Note that not all plans report on all measures. Statistical significance is determined at the 5% level of significance. Overall, ACAP is better (with statistical significance) in 43 measures, better in 45 measures, worse in 25 measures, and worse with statistical significance in 1 measure. Below is a list of ACAP plans that submitted HEDIS information to Quality Compass this year.

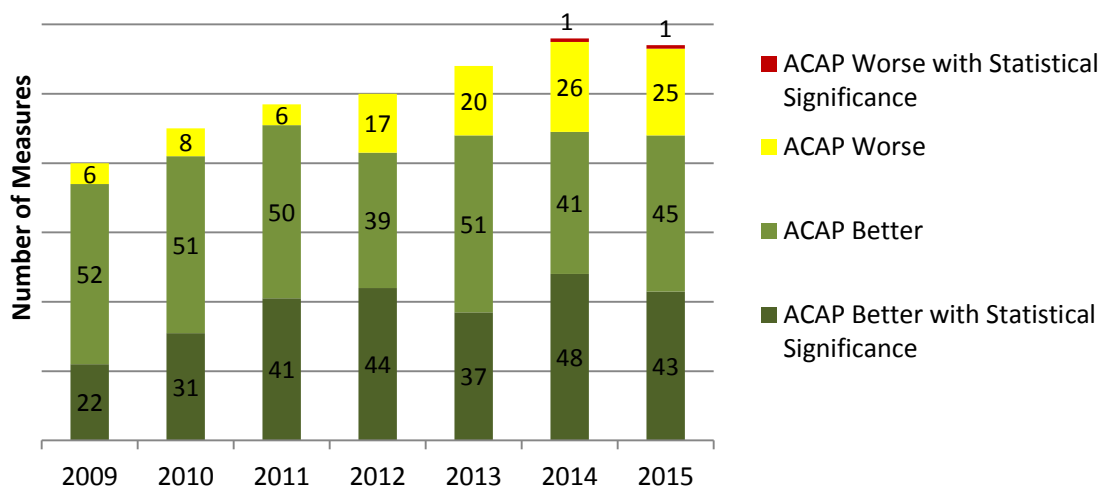

- Alameda Alliance for Health
- AlohaCare
- AmeriHealth Caritas Pennsylvania
- Boston Medical Center Health Plan
- CalOptima
- CareSource
- CenCal Health (2 geographic entities)
- Children's Community Health Plan, Inc.
- Community Health Choice
- Community Health Group

### ACAP Plans vs. Non-ACAP Plans Medicaid HEDIS Measures, 2015 Quality Compass

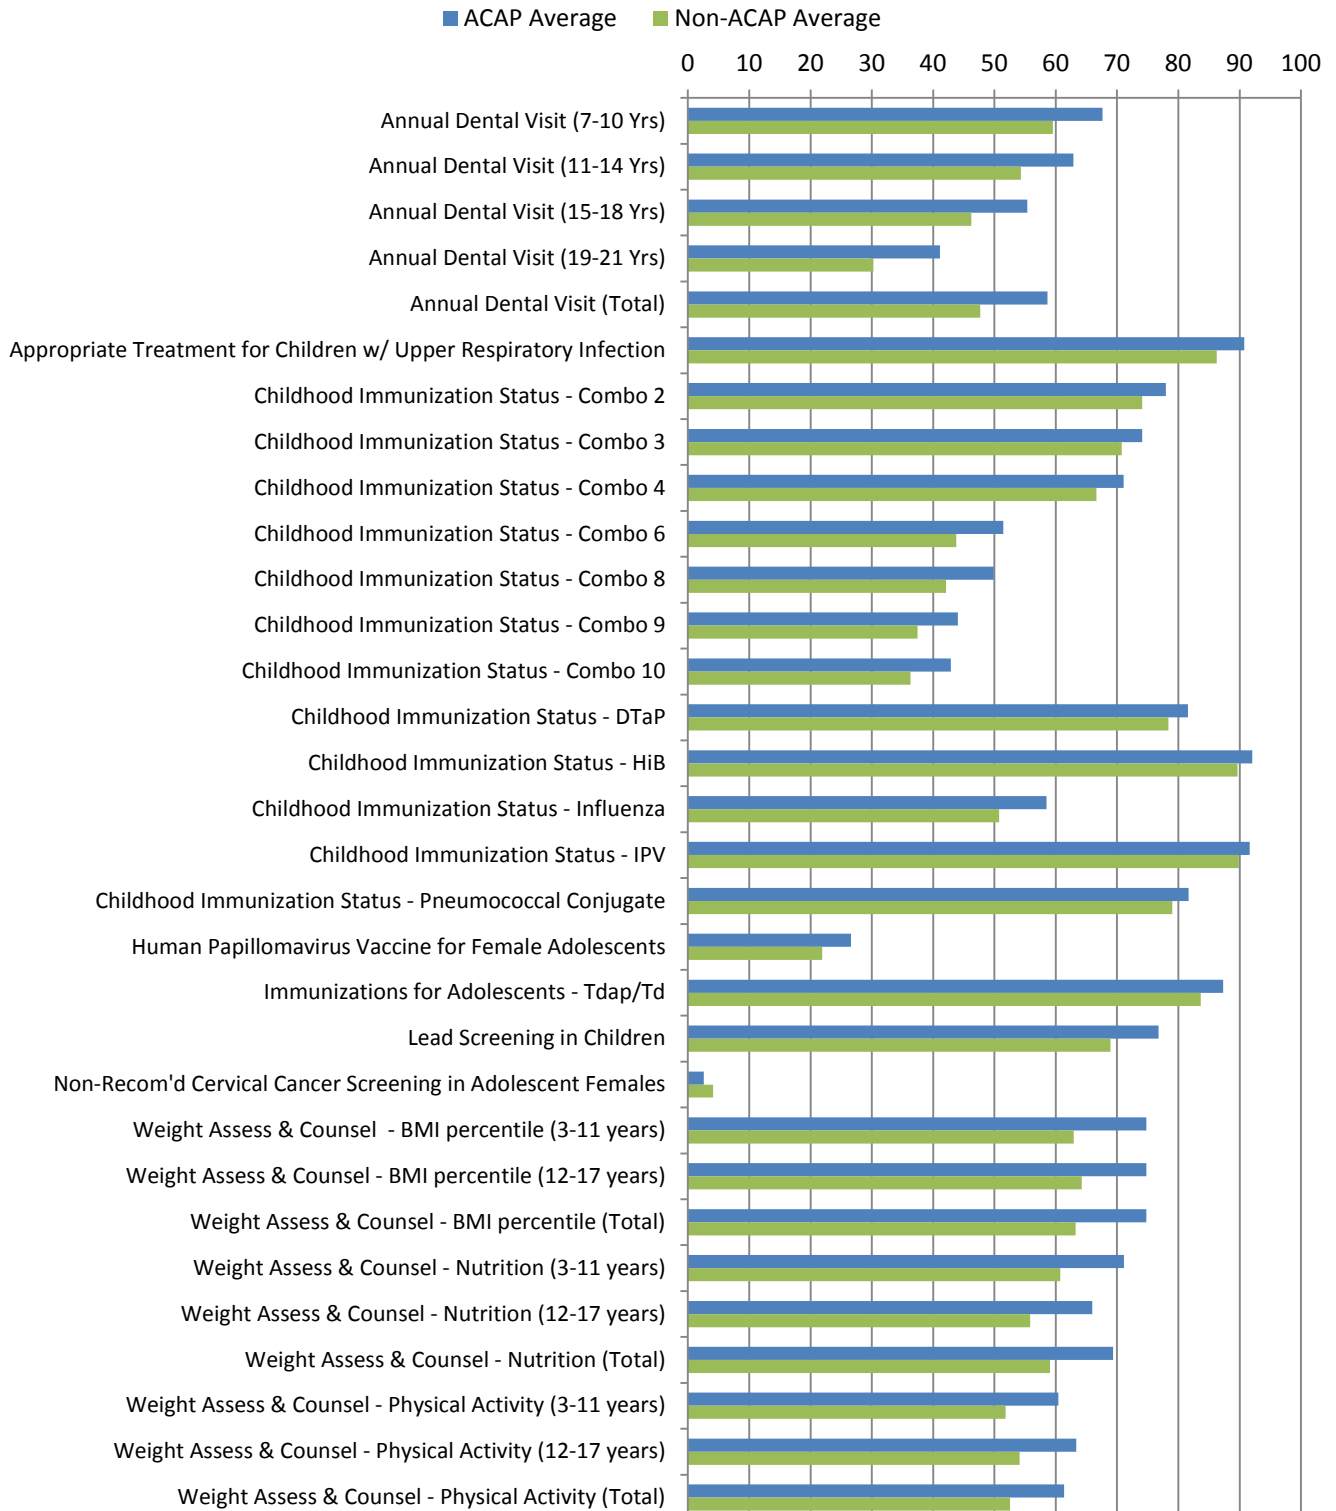

### ACAP Plans vs. Non-ACAP Plans Medicaid HEDIS Measures, 2009-2015

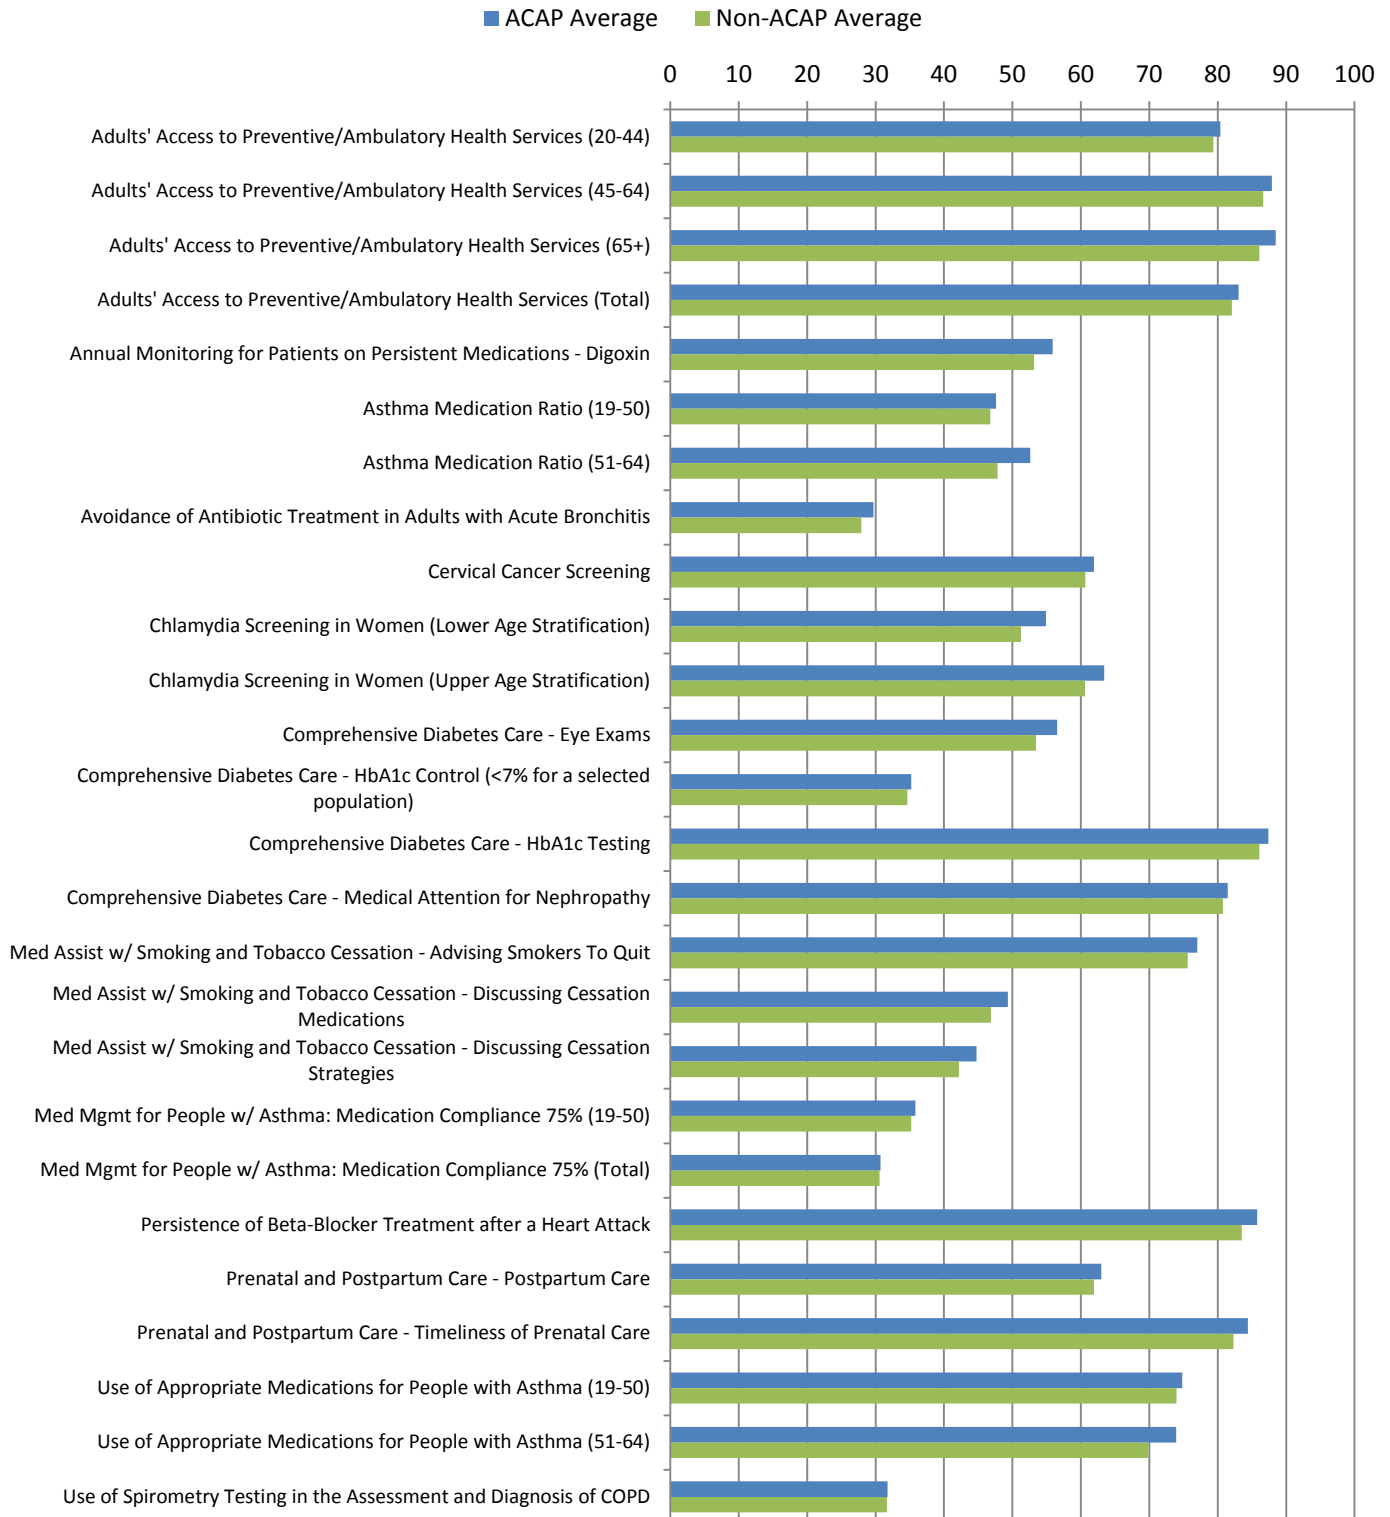

## ACAP HEDIS Scores Better with Statistical Significance than Non-ACAP Scores Adult Measures

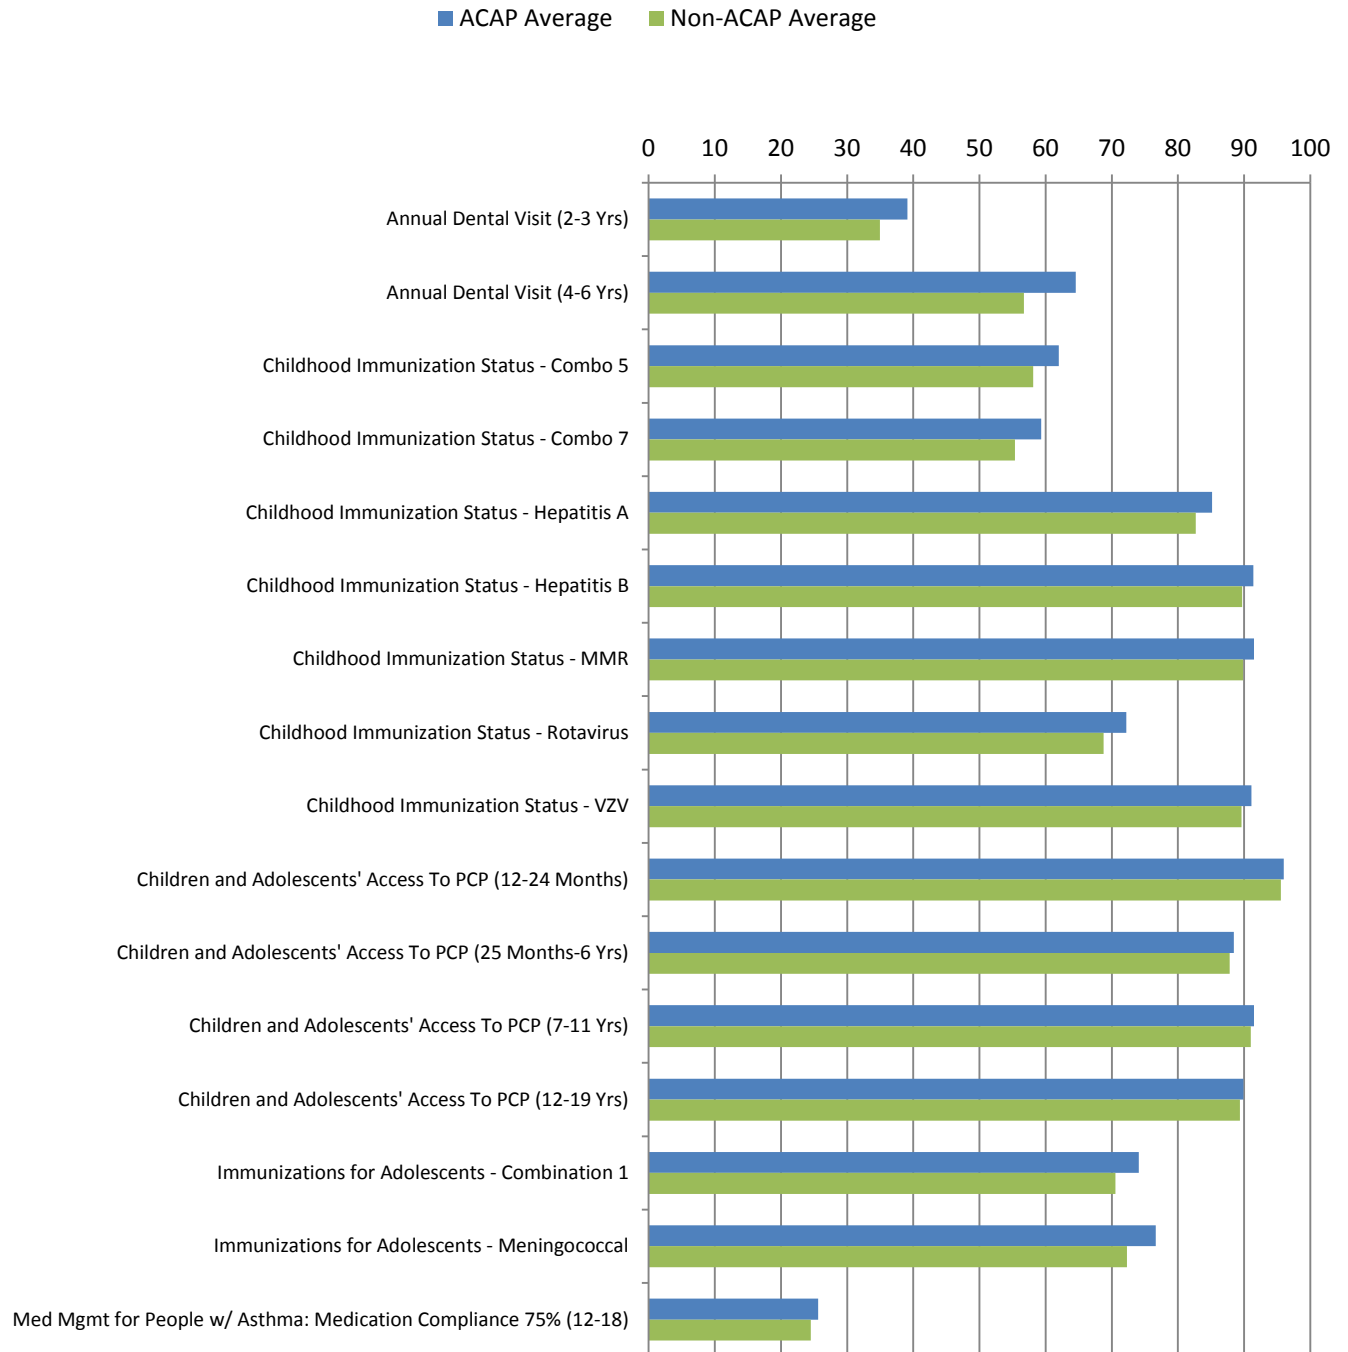

## ACAP HEDIS Scores Better with Statistical Significance than Non-ACAP Scores Child Measures

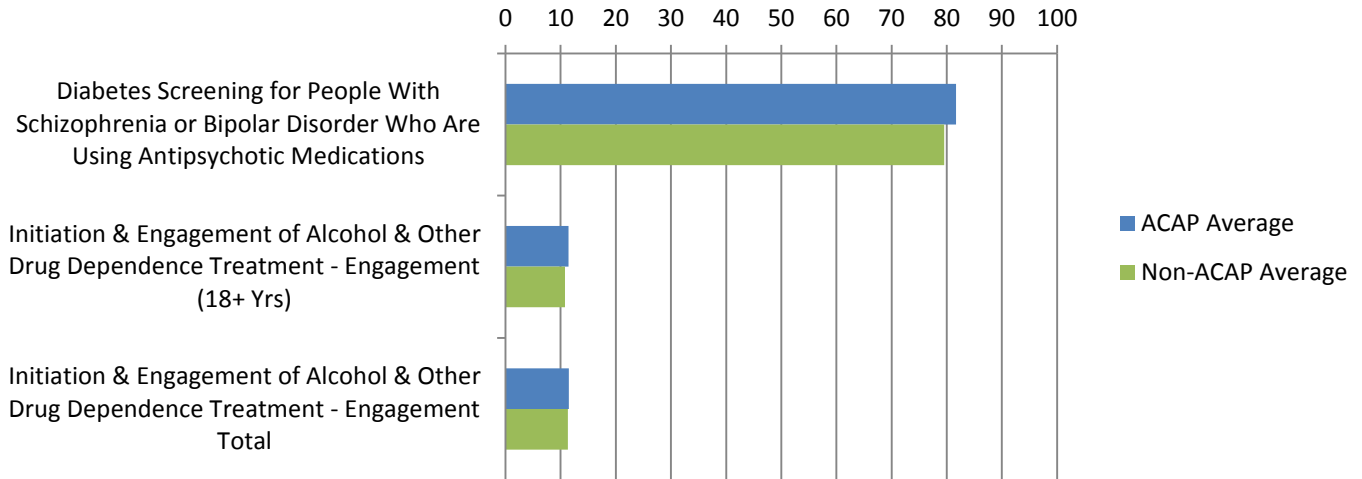

## ACAP HEDIS Scores Better than Non-ACAP Scores Adult Measures

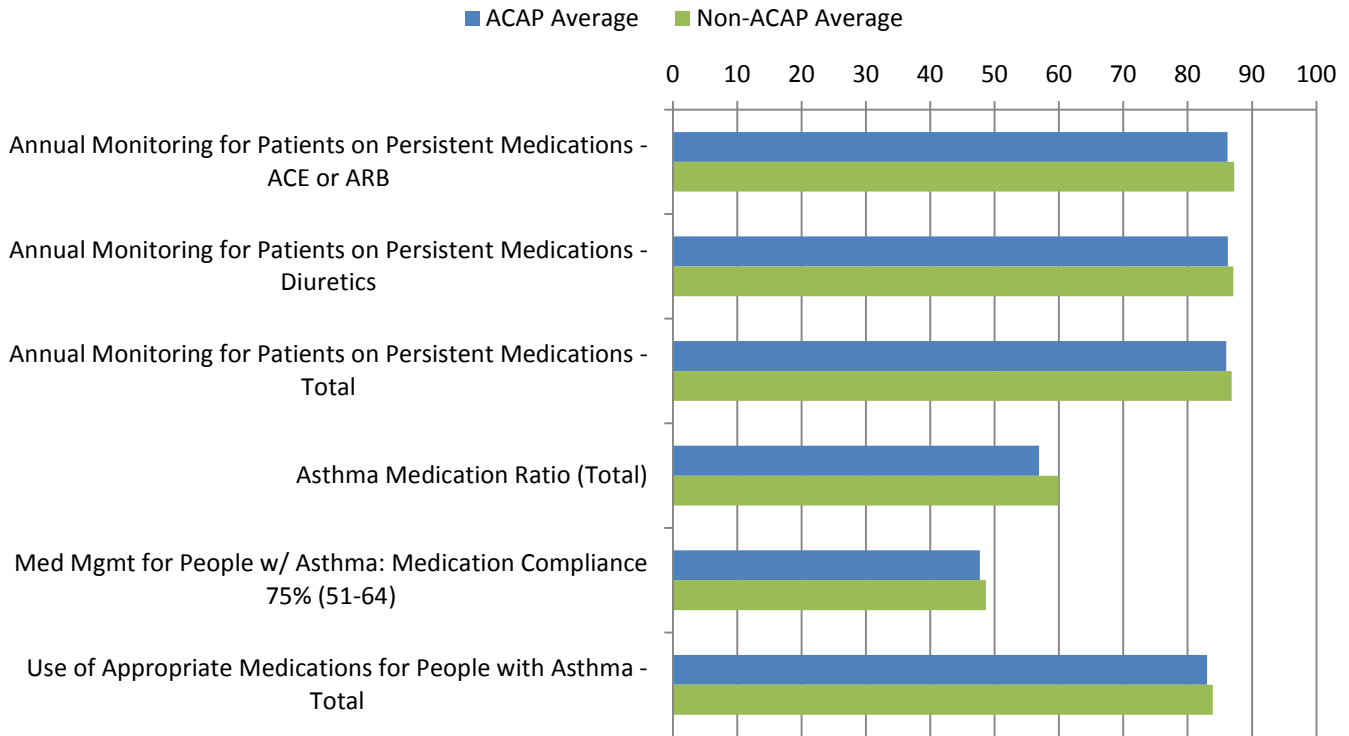

## ACAP HEDIS Scores Better than Non-ACAP Scores Child Measures

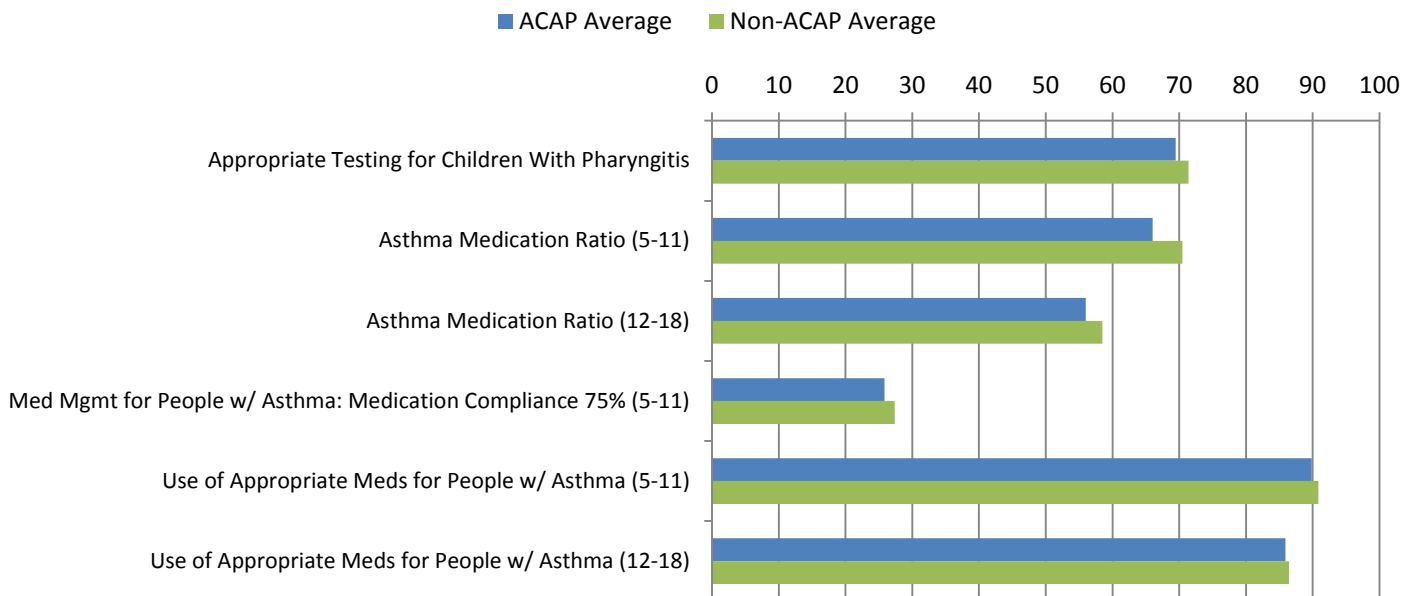

## ACAP HEDIS Scores Better than Non-ACAP Scores Behavioral Health Measures

### ACAP HEDIS Scores Worse than Non-ACAP Scores Adult Measures

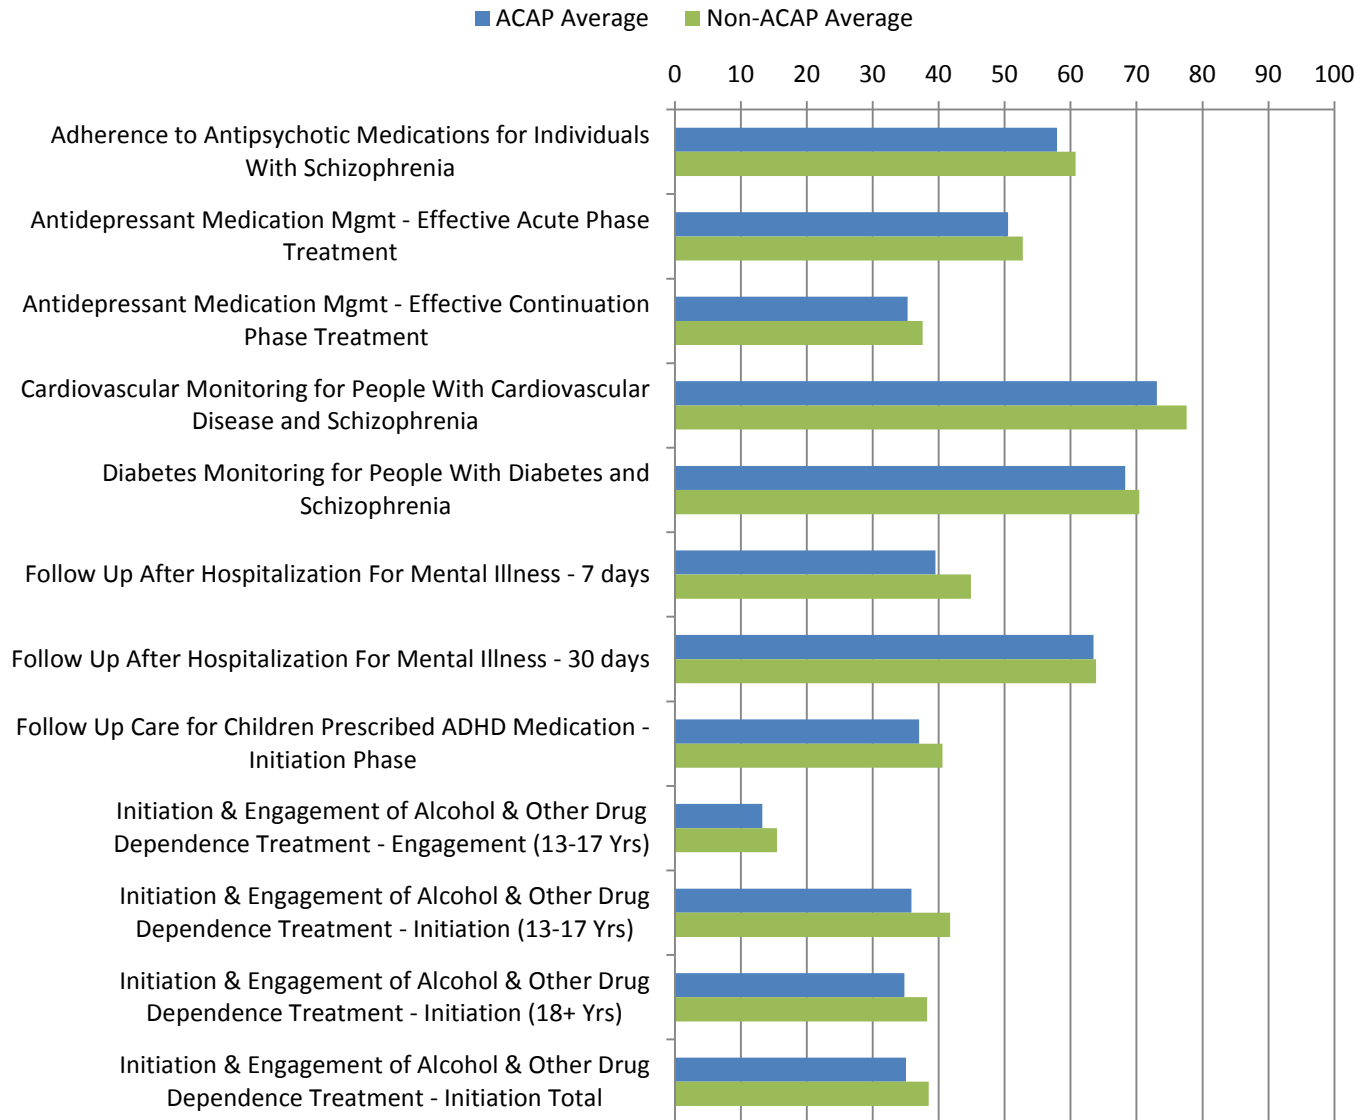

### ACAP HEDIS Scores Worse than Non-ACAP Scores Child Measures

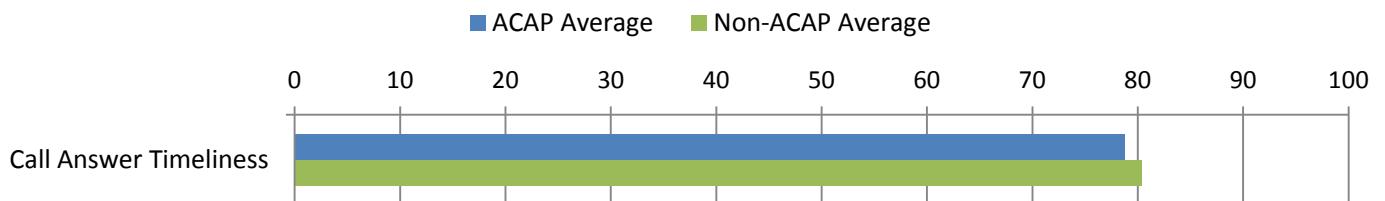

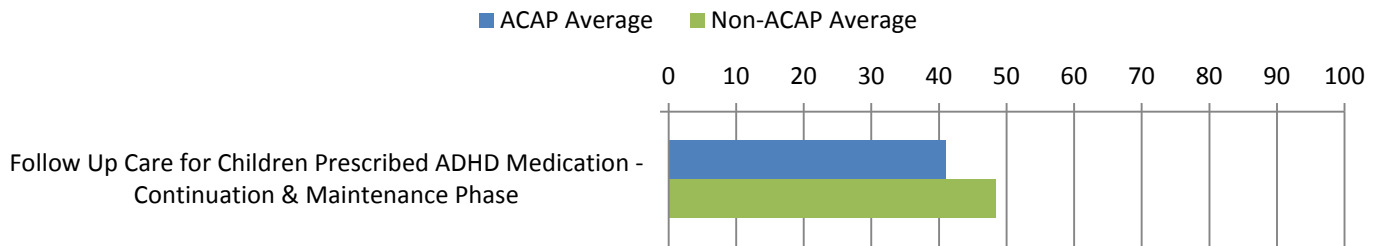

## ACAP HEDIS Scores Worse than Non-ACAP Scores Behavioral Health Measures

## ACAP HEDIS Scores Worse than Non-ACAP Scores Operational Measure

### ACAP HEDIS Scores Worse with Statistical Significance than Non-ACAP Scores Behavioral Health Measures

### Variation within ACAP:

Some of the measures showed great variation among ACAP plans, including:

- Adult BMI Assessment
- Annual Dental Visit for all age groups
- Appropriate Testing for Children With Pharyngitis
- Call Answer Timeliness
- Follow Up After Hospitalization For Mental Illness - 7 days and 30 days
- Follow Up Care for Children Prescribed ADHD Medication - Continuation & Maintenance Phase
- Immunizations for Adolescents - Combination 1 and Meningococcal
- Lead Screening in Children
- Pharmacotherapy Management of COPD Exacerbation - Systemic Corticosteroid
- Weight Assessment and Counseling for Nutrition and Physical Activity for Children/Adolescents, BMI percentile for all age groups
- Weight Assessment and Counseling for Nutrition and Physical Activity for Children/Adolescents, Counseling for Physical Activity for all age groups
- Weight Assessment and Counseling for Nutrition and Physical Activity for Children/Adolescents, Counseling for Nutrition for all age groups

### ACAP Response:

While on average ACAP scores compared considerably well compared to the other plans submitting to NCQA Quality Compass, there is remains some variation among ACAP plans on some measures. To address this, ACAP will continue to coordinate plan-to-plan sharing on measures with the largest standard deviations. ACAP will again provide education and technical assistance concentrating on measures where ACAP on average has worse scores and where average scores are below benchmark of 50<sup>th</sup> percentile. Again, given the generally positive results, ACAP will continue to highlight these Quality Compass results in its strategic communications on the enduring benefits of Safety Net Health Plans.
