

# Medicaid Managed Care Prescription Drug Savings

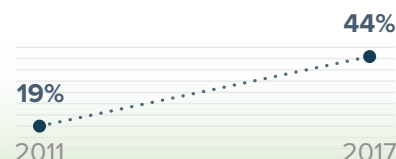

Medicaid managed care organizations (MCOs) handle a large and growing share of prescription drug expenses.

**Percentage of Medicaid Prescription Drugs Paid for by MCOs**

These prescription drugs—especially highly-specialized, high-cost medications – are getting more expensive.

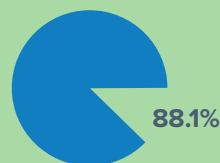

**Percentage of Medicaid Pre-Rebate Spending on High-Cost Prescription Drugs (Over \$1,000)**

Both MCOs and the Medicaid fee-for-service model use a comparable share of generics.

**Medicaid Generic Drugs as a Percentage of All Drugs**

MCOs

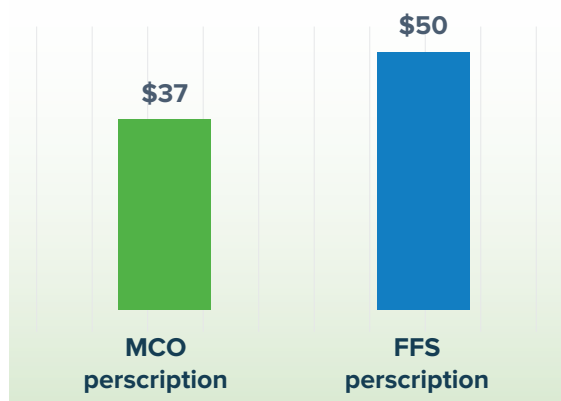

Fee-for-service

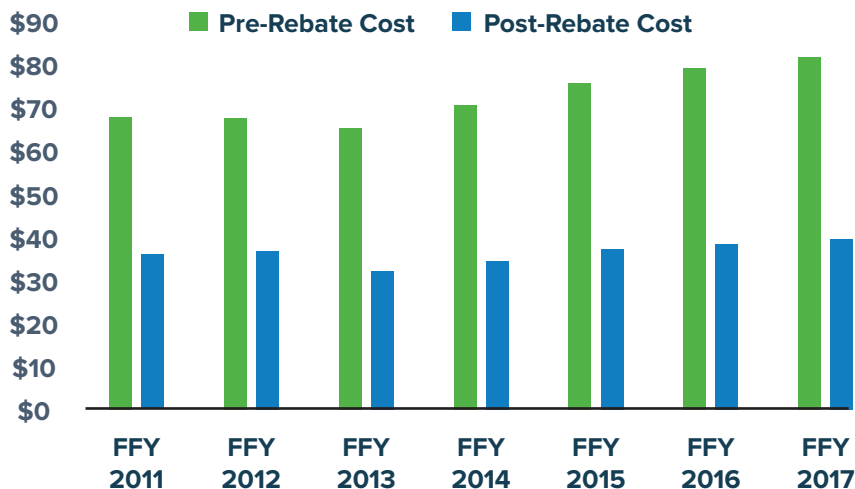

But MCOs deliver more savings to patients than fee-for-service models.

**Average Post-Rebate Cost of a Medicaid Prescription in 2017**

**Average Cost Per Medicaid Prescription**

Post-rebate costs for prescription drugs are increasing at a far slower rate than pre-rebate costs.

**MCOs' prescription drug benefit management efforts yield large-scale savings.**
